SWORD Reports

A SWORD Report is a curated snapshot of the most relevant and timely cyber threats, trends, and alerts affecting your organization and industry. Delivered in plain language and tailored to your environment, it empowers leadership and IT teams to stay ahead of potential risks, make informed decisions, and strengthen operational awareness.

How Can We Help?

We deliver a streamlined, actionable brief designed for both technical and business audiences:

Cybersecurity doesn't stop at firewalls and tools—it requires awareness and vigilance. A SWORD Report puts vital threat intelligence directly into your team's hands, every single day.

- **Curated Intelligence from Trusted Sources**
- **Tailored to Your Environment**
- **Plain-Language Summaries**
- **Delivered via Your Preferred Channel**
- **Optional Alerting & Escalation**

Why It Matters?

The cybersecurity landscape evolves rapidly, with new vulnerabilities, exploits, and threat campaigns emerging daily. However, most organizations don't have the time or resources to monitor every advisory, bulletin, or news source. A focused SWORD Report cuts through the noise—bringing you only what matters most. It also encourages a culture of shared awareness, helping both technical and non-technical stakeholders stay alert and aligned.
